

# Doctor Discussion Guide

These conversation starters can help you talk to your doctor at your next appointment. If your doctor is unable to offer you further treatment options, ask for a referral to an epilepsy specialist. Or, use the Find a Center tool on [NeuroPace.com/findacenter](http://NeuroPace.com/findacenter) to find a Comprehensive Epilepsy Center near you.

## Suggested topics for discussion with your doctor

1. I would like to consider additional treatment options beyond more medication.
2. I'm interested in learning more about advanced treatment options for drug-resistant epilepsy, what would be the next steps to figure out if I might be a candidate?
3. How do I find out what type of seizures I have?
4. I recently learned more about the NeuroPace RNS System for drug-resistant focal epilepsy, is this something that I might be a candidate for?
5. What types of advanced treatments are available at a Comprehensive Epilepsy Center?
6. What are the differences between the treatment options available?
7. If I am a candidate for an advanced treatment option, what are the next steps?
8. What types of results might advanced seizure treatments provide for me?
9. What kinds of side effects are associated with the various treatment options?
10. My additional questions:
